BIXPY BATTERY OPTIONS

Three battery options are available for running your Bixpy Jets. Two handheld battery packs to turn your Bixpy Jet into a Swim Jet and one Battery Box for Kayaks, SUPs and other watercraft. The only difference between the two handheld battery packs is their capacity. The smaller battery has been specifically designed to comply with FAA and IATA regulations to allow you to fly with your Bixpy Jet.

Snorkel Edition

Handheld Battery Pack

- Slight positive buoyancy - 3.50 lb
- 98 Wh capacity for air travel
- 1:30 hour charge time
- 25 min. of continuous full speed use
- 75 min. of typical use time
- Action camera mount

Scuba Edition

Handheld Battery Pack

- Slight negative buoyancy - 4.0 lb
- 147 Wh capacity for longer use time
- 2:30 hour charge time
- 40 min. of continuous full speed use
- 120 min. of typical use time
- Action camera mount

Outboard Battery

- Light-weight & buoyant - 7.0 lb
- 400 Wh capacity
- 4 hour regular charger included
- 65 min. of continuous full speed use
- 6 hours of slow speed use
- 5V and 12V power outlets

Tests on the watercraft above were performed using Bixpy Jet on a lake with no wind or current. They are only for illustrative purposes and to give users a better understanding of the product's capabilities. You may or may not be able to replicate these results depending on your specific vessel, water conditions and actual setup. Durations indicated for continuous non-stop use of motors. Keep in mind that all kayaks and SUPs have a hull speed that limits them to a fixed speed regardless of motor power. Generally the less surface area that touches water, the faster the vessel travels.

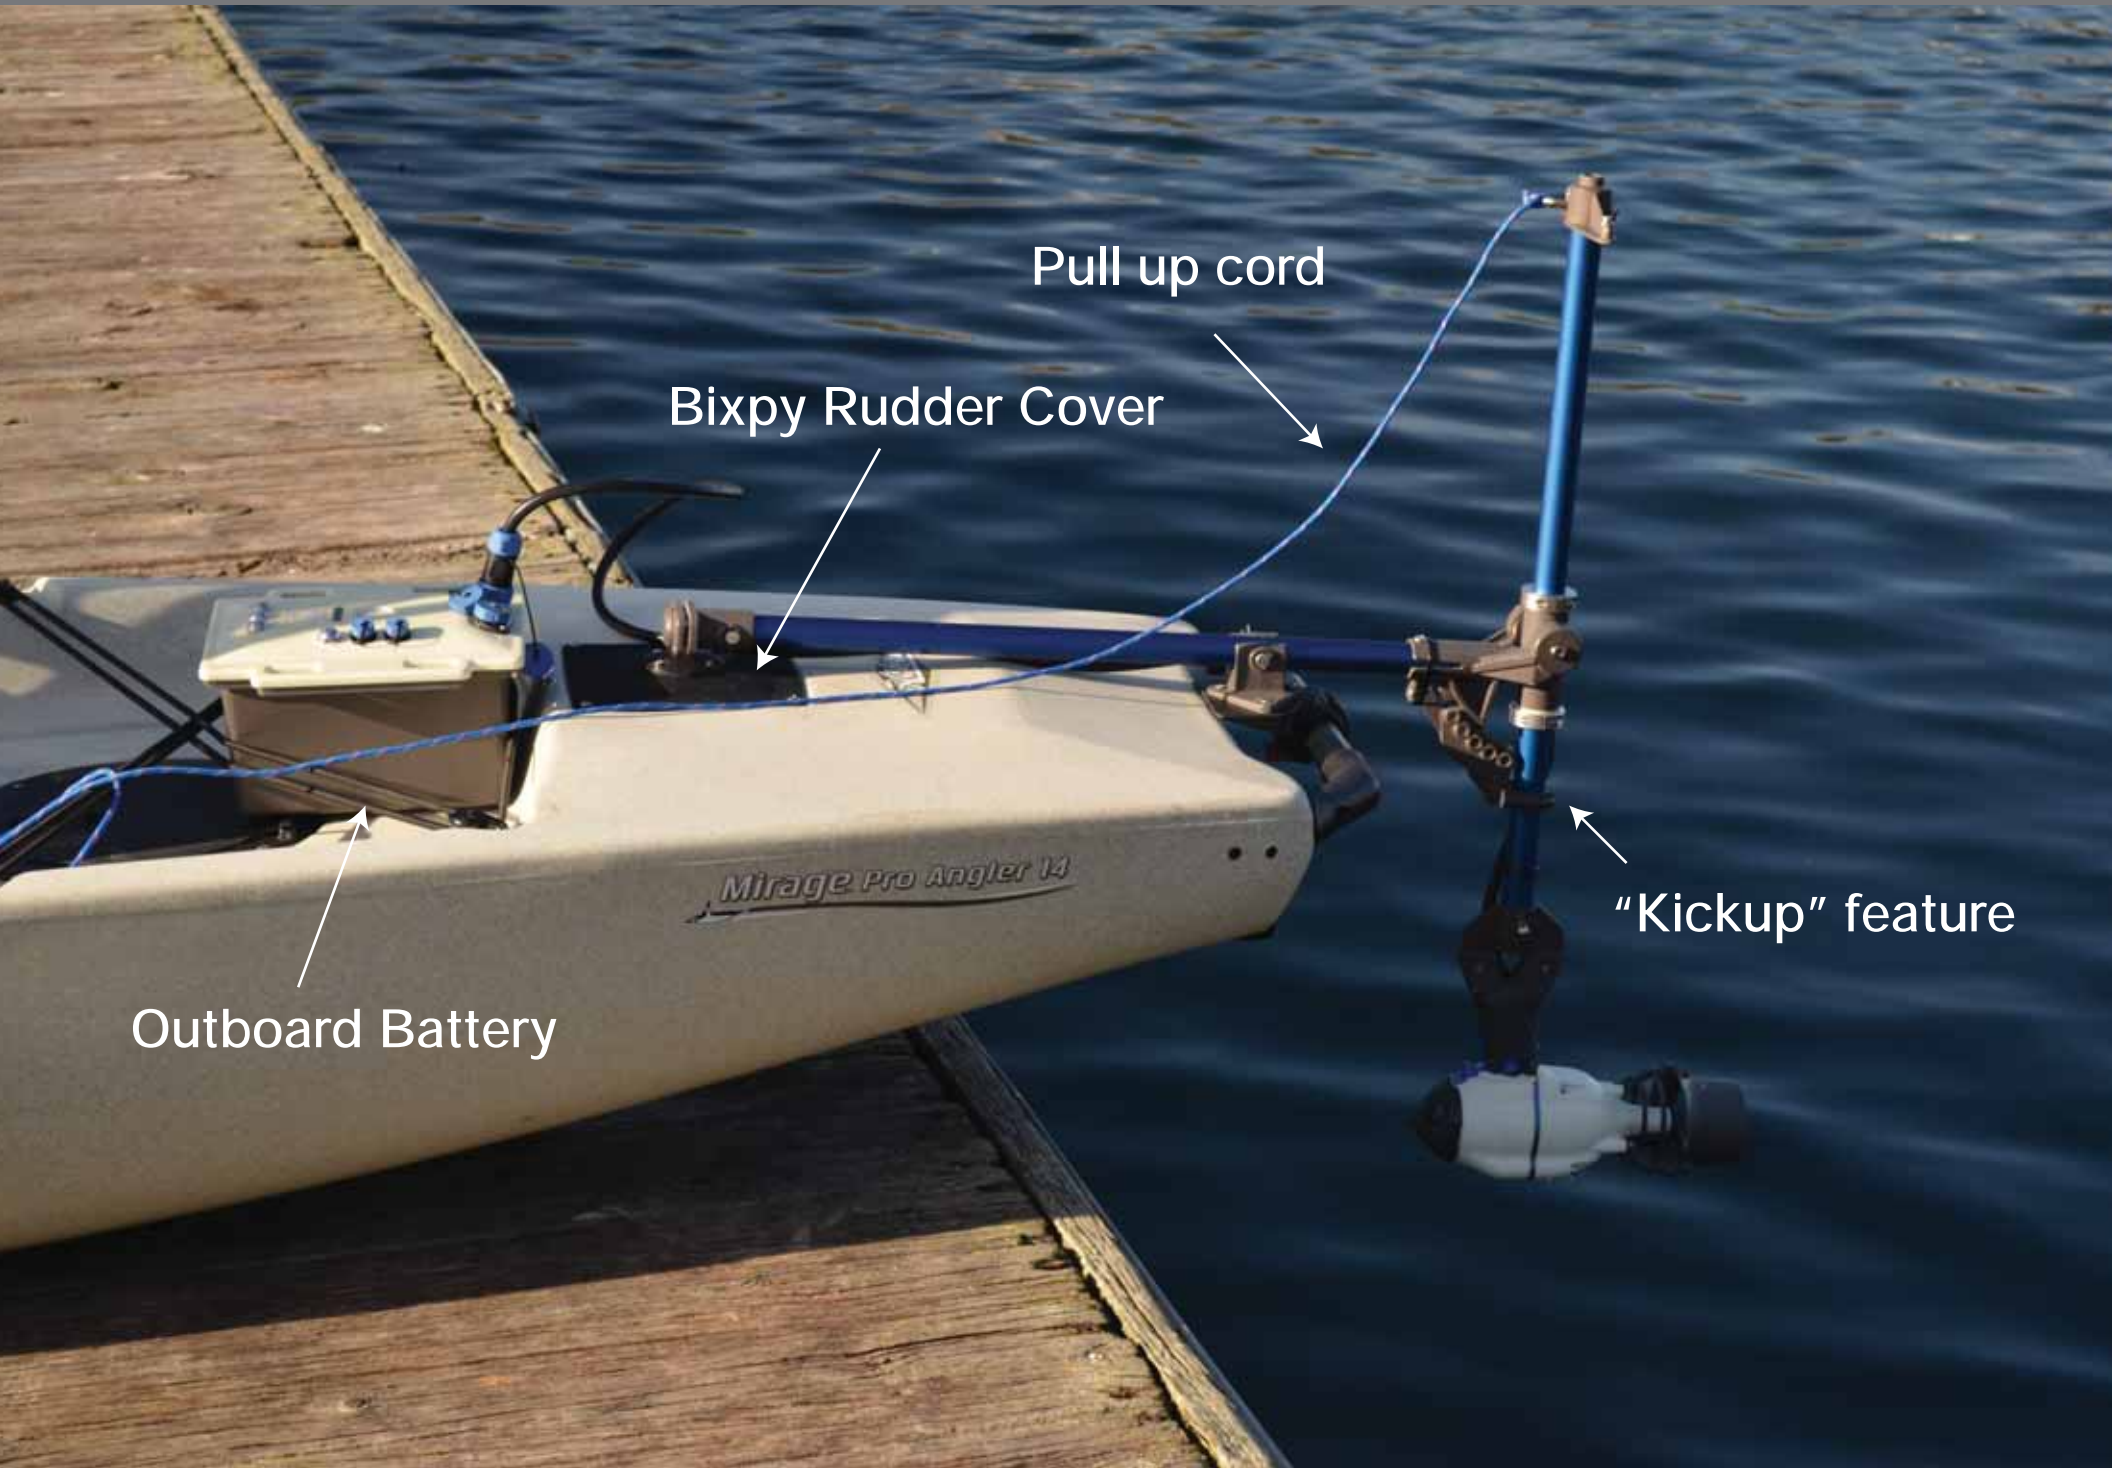

POWERING YOUR OUTBOARD MOTORS

- The Bixpy Outboard Battery is: 25.9 V • 15,600 mAh • 404 Wh
- Variable speed: 10 speeds forward
3 speeds reverse
- Magnetic kill switch instantly stops motor when disengaged
- Intuitive LED battery status indicator
- Fully sealed, waterproof and buoyant
- 5V and 12V (max 3 Amp) output connector for charging phones and running accessories
- Approximately 4 to 5 hours to charge a drained battery with a standard Bixpy 3A charger
