Axopar Boats

Finnish builder Axopar Boats created a true driver's delight with its 22 Spyder thanks to the boat's highly maneuverable twin-stepped, deep-V hull. Seaworthiness, safety, and fuel efficiency are key design elements of this peppy runabout. The helm console has room for a multifunction display, two comfortable bucket seats, and a high Venturi windshield. Modular by design, the 22 Spyder (23' 7" LOA, 7' 4" beam) features a front cockpit with bow seat and an open aft cockpit that can be configured with a rear bench seat, U-shaped lounge, sunpad, or multi-storage compartment. *axopar.fi*

Highfield

Ideal for both family distance cruising and commercial or club use, the Patrol 540 Adventure Version (17' 9" LOA, 8' 2" beam) is a perfect all-around RIB tricked out with features and options for someone taking it on longer trips, adventures, fishing, or for a day boating with the family. The super deep-V, chromated and powder-coated aluminum hull with wide chines and large diameter ORCA Hypalon fabric tubes offer high maneuverability, safety, and a soft, dry ride even in the roughest conditions. They're designed to carry large loads and plane quickly and easily with modest horsepower. The Patrol 540 is rated for 12 persons and 115 horsepower. The new Classic 360 GT and the Highfield Sport 800 with 350 horsepower will also be on display. highfieldnorthamerica.com

De Antonio

The De Antonio D42 is an ideal family cruiser with sporty features and an exceptional design. A hydraulic stern platform conveniently hides the standard triple Mercury Verado 300s outboards from view. The 42-foot boat's (13' beam) spectacular walkaround design with large sun decks, bow lounge, and modular center seats creates three different zones. Along with an exterior galley, guests enjoy every inch of this boat. Other spacious areas include a central garage for a small tender and two cabins below. A Simrad navigation system and LED lights will help guide the captain to his destination. deantonioyachts.com

WINDY

Swedish builder Windy and naval architect Hans Jørgen Johnsen designed the SR44 for seakeeping ability and range. Powered by twin Volvo Penta IPS drives, the 46-foot model (13' beam) can reach a top speed of 45 knots. A small galley is concealed under the aft sun deck, and the cozy cabin offers a place to get some rest.

Windy's customization program lets owners personalize their boat.

Northstar

Northstar's first member of cruising RIBs, Orion 7 (22' 6" LOA, 9' 1" beam) provides daily needs for longer voyages. Designed by Adam Younger, Orion stepped hulls offer the latest in stepped hull geometry with unmatched standard features that other brands consider options. Evo 2 hulls are produced with vacuum infusion for unparalleled strength and lightness and provide a very high level of stability at high speeds. Standard features include large storage compartments, twin flip-up seats, Silvertex marine upholstery, glove box with USB socket, Hypalon tubes, and more. northstarboats.com
